DISPLAYS

TECHNOLOGY AND APPLICATIONS

Index to Volume 15 (1994)

No 1 pp 1–64
No 2 pp 65–136
No 3 pp 137–200
No 4 pp 201–264

Article index

Number 1

A telepresence robot for surveillance use and development of its autonomous movement
J. Nomura, T. Nishiyama and R. Nakajima 7

Present status and future trends of multichannel hollow cathode true flat fluorescent lamp for full-colour LCD backlighting
M. Anandan and D. Ketchum 17

Reading performance and visual comfort with scale to grey compared with black-and-white scanned print
J. E. Sheedy and M. McCarthy 27

Display means design by the synthesis of ergonomic and engineering studies
I. I. Litvak 31

Colour display gamuts and ambient illumination
D. L. Post and C. J. C. Lloyd 39

Tilt of liquid crystal director controlled by phase of spatially modulated voltage
N. V. Tabiryan and C. F. Clerc 45

Number 2

Special Issue: Cockpit Displays
Guest Editor: C. T. Bartlett, GEC-Marconi Avionics Limited, UK

Visual accommodation problems with head-up and helmet-mounted displays?
G. K. Edgar, J. C. D. Pope and I. R. Craig 68

Aircraft vibration and the readability of an electronic flight instrument display
J. P. Viveash, A. N. Cable, S. K. King, J. R. R. Stott and R. Wright 76

The 24-hr helmet-mounted display
A. A. Cameron 83

Binocular HMD for fixed-wing aircraft: a trade-off approach
A. Leger, C. Roumes, C. Gardelle, J. P. Cursolle and J. M. Kraus 91

Integrated helmet system with image intensifier tubes
H. Schreyer, H.-D. V. Böhm and B. Svedevall 98

Third generation DASH helmet
P. Gilboa and S. Abraham 106

Aircrew helmet design and manufacturing enhancements through the use of advanced technologies
D. P. Cadogan, A. E. George and E. R. Winkler 110

A high-resolution ferroelectric liquid crystal display
J. R. Hughes, R. W. Bannister, A. Graham, D. G. McDonnell, H. A. Pedlingham, D. C. Scattergood and C. J. T. Smith 117

A practical application of computer-generated holography to head-up display design
C. T. Bartlett 124

Digital imaging technology applied to crewstation display management
L. Y. Nelson and J. R. Green 131

Number 3

Special Issue: Interactive Computer Animation
Guest Editor: Professor Nadia Magnenat-Thalmann, MIRALab, Geneva, Switzerland

Impromptu Conductor: a virtual reality system for music generation based on supervised learning
R.-H. Liang and M. Ouhyoung 141

The CRM device: a force feedback gestural transducer to real-time computer animation
A. Luciani, C. Cadoz and J. L. Florens 149

Real-time facial interaction
I. S. Pandžić, P. Kalra, N. Magnenat Thalmann and D. Thalmann 157

Throwing and diving: not so simple challenges for computer animation
M. F. Cohen 165

Pipeline rendering: interactive refractions, reflections and shadows
P. J. Diefenbach and N. I. Badler 173

Articulation simulation for an Intelligent Dental Care System
T. L. Kunii, J. Herder, K. Myszkowski, O. Okunev, G. G. Okuneva and M. Ibusuki 181

Number 4

Classification of colours presented against different coloured backgrounds
S. McFadden, R. Kaufmann and M. Janzen 203

Colour for air traffic control displays
L. Reynolds 215

Visual appearance and its fidelity evaluation of digital images displayed by means of orthogonal transform and adaptive spatial filter
M. Iizuka 226

Factors influencing the design of perspective flight path displays for guidance and navigation
E. Theunissen 241

Binocular vision in a bi-ocular world: new-generation head-mounted displays avoid causing visual deficit
S. Rushton, M. Mon-Williams and J. P. Wann 255

Author index

Abraham, S. 106
Anandan, M. 17

Badler, N. I. 173
Bannister, R. W. 117
Bartlett, C. T. 124
Bohm, H.-D. V. 98

Cable, A. N. 76
Cadogan, D. P. 110
